The Antal Atlas and Travel Guide - Interactive Map

https://valdidan-edtools.gitlab.io/utopia_regions/

The reaches of our beloved SimGuru are vast and far reaching, which does come with the problem of sometimes not knowing what you are actually fighting for or why this specific system/area is important to hold. Like, what is Concordia and why are we fighting tooth and nail over it? Why do we care about Miki or Suraci?

The goal of this project is to map out Antal space and group systems into regional areas with descriptions, history, interested CMDRs and actual human readable names to reference them! Think of it like the current Enclave area: When we talk about “the Enclave” it is understood that we mean the area centered around HIP 87621 with the history of it being the staging ground for a free-for-all against all powers (which Utopia has arguably won).
