

Templates

This book contains various page templates that can be used when creating a new page or which are automatically loaded when set as default for individual books.

Note that these templates are public and should not include restricted information. If you require a restricted template you must create one in a restricted book.

⚠ **This page is restricted to <blank>!**

Make sure not to share any information or direct links to images on this page with CMDRs that are not verified <blank>. When in doubt you should simply link them to this page instead.

This page is a template for new templates! Note that the above notice is technically a table with two cells, one cell for the image and one cell for the warning text. Depending on what template you want to create you can delete the cell with the image and/or edit the text as needed. The background color is set for the entire table.

Templates can either be manually added when creating/editing a page or they can be set per Book/Chapter to automatically be added when creating a new page.

Templates created in the "Templates" book are public to everyone! If you want to hide the template then it has to be created in a Book/Chapter that has restricted permission. If you do that, note that the template will then only be visible to other CMDRs that have the permission to view the Book/Chapter, including when trying to create a new page!
